Dear Dr. Lin:

*Social Studies Research and Practice* Has received the reviews of MS 06221. The key points of the review follow. Based on the reviews, the manuscript is accepted for Volume IV, Issue 3 (November, 2009). Your submission is much appreciated.

- The idea of multiple perspectives is just essential to the social studies and this lesson has a focus on a war and time period that teachers often speed through.

- The author provided excellent background material for the lesson and very complete directions for use. This could be used by teachers at any experience level.

- The writing was very clear, easy to read and well organized.
