# Problem Statement

Terrorism is a big threat to the world, inefficiencies in the Amtrak Station security and intelligence can create chaos and our project is to address the dynamic threat keeping abreast with the latest technology and best practices.

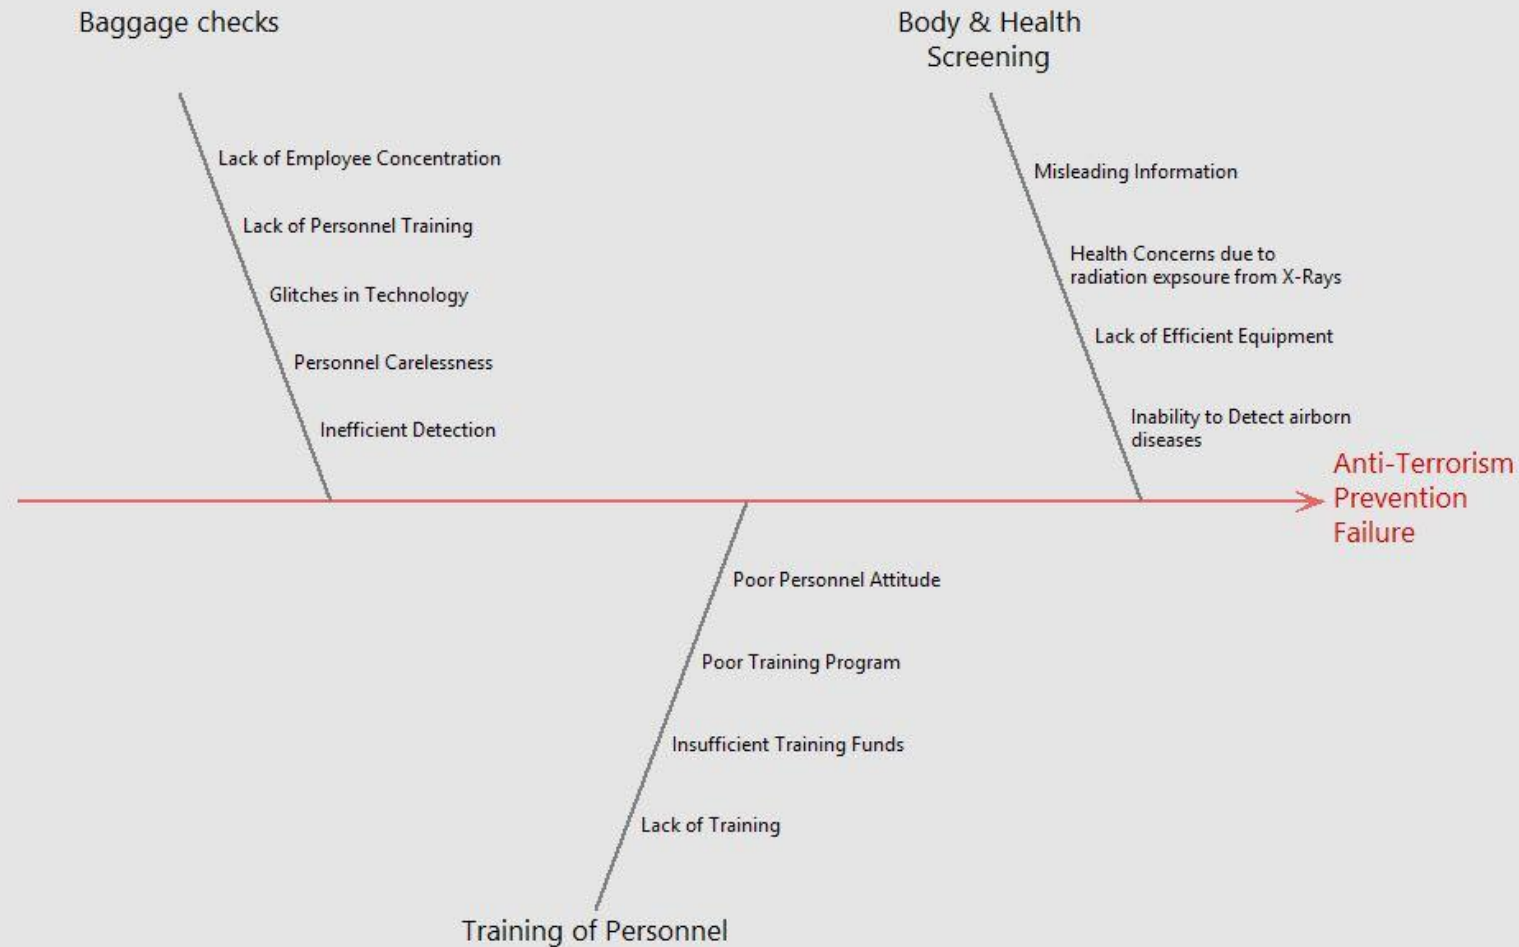

# Flightchart

# Fishbone or Ishikawa Chart

## Anti-Terrorism measures fails for these reasons

# COPQ

Process	Internal Failures	External Failures	Appraisal	Prevention
Baggage and carry on checks	Insufficient staff. Arms and weapons. Lack of quality equipment and funding for better machines.	No Prescreening done.	-	Better trained staff and create more funding for larger staff.
Body screening/frisking	Lack of quality machines for checks and low staff.	No Prescreening done.	Screening.	Investing in good machines and training staff well.
Personnel Training Practices	Lack of funding lack of good training programs.	Lack of recruitment.	Evaluating all employees involved.	Constantly improve the conditions and incentivise working in AMTRAK.

# Brainstorming and Affinity

## Training of personnel

Lack of high level training

Low investment in training

Poor security development program

Lack of retaining

## Body & Health Screening

No efficient equipment

Poor investment in Health hazard detections

Health concerns on Radiation

Need of updated technologies

## Customs & Cargo Checks

Licensing and legal documentation

Poor security and surveillance

Obsolete technologies

Lawsuits and reports
