A Conversation with Donald J. Wheeler
William H. Woodall
- 366
Principles of Exploratory Data Analysis in Problem Solving: What Can
We Learn from a Well-Known Case?
Jeroen de Mast and Benjamin P. H. Kemper
- 376
Discussion of "Principles of Exploratory Data Analysis in Problem Solving:
What Can We Learn from a Well-Known Case?"
James R. Simpson
- 380
Geoff Vining's Discussion of "Principles of Exploratory Data Analysis in Problem
Solving: What Can We Learn From a Well-Known Case?"
Geoff Vining
- 382
Discussion of "Principles of Exploratory Data Analysis in Problem Solving: What
Can We Learn From a Well-Known Case?"—Rejoinder
Jeroen de Mast and Benjamin P. H. Kemper
- 384
Designed Experiments with Fixed and Varying Factors—A Cautionary Tale
Stefan H. Steiner and R. Jock MacKay
- 392
A Designed Screening Study with Prespecified Combinations of Factor Settings
Christine M. Anderson-Cook and Timothy J. Robinson
- 405
Illustrating the Future Prediction of Performance Based on Computer Code,
Physical Experiments, and Critical Performance Parameter Samples
M. S. Hamada and D. M. Higdon
- 416
Order Statistics for a Two-Level, Eight-Run Saturated-Unreplicated
Fractional-Factorial Screening
George J. Besseris
- 432
Deciphering All Those Minimum Aberration Criteria for Experimental Designs
Yong Guo, James R. Simpson, and Joseph J. Pignatiello, Jr.
