

November 25, 2013

To whom it may concern,

Subject: Jorge Romeu Letter of Appreciation

I would like to thank Dr. Romeu for his help in working with SUNY Broome Community College and the SEED Program (Scholarship for Education and Economic Development). This program is funded by US AID and in cooperation with Georgetown University. Students from seven different countries from Central America and Caribbean come to come to SUNY Broome for two years to study Quality Assurance.

We have had the opportunity to meet Dr. Romeu as when he was a speaker at our Leadership Conference held February 18, 2013. We were delighted to hear about his personal experiences when he spoke about "Some Benefits from My Study Abroad ". His words helped all 37 of our students helped identify with many of the same things they are experiencing at the moment.

Dr. Romeu is always very professional and gives his time freely to help all the students in our program. It is difficult to find someone like Dr. Romeu who can speak about topics the students can identify with. It is because of that we would like to invite him to speak again for our "Winter Review Program" in January 2014 a speaker for the topic: "Overview of Quality Engineer theory and its implementation."

I would like to personally thank him for everything he has done to help the students of the SEED Program. He was able to show the benefits of being bi-lingual in both your professional and personal life. We hope he can continue to be a part of our program. His dedication is what makes programs like ours possible. Thank you so much for everything you do for us.

Sincerely,

Claudia Sofia Beebe
SEED Program Coordinator
