

# DFSS, & QFD / House of Quality

By Group 4

## Our example:

Your boss comes up to you and says that he needs a new kind of rebar that is more durable than the kind the company currently produces

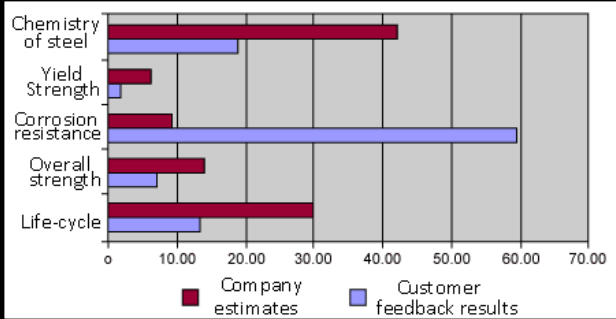

Following the design for six sigma (DMADV) guidelines, come up with a procedure to complete this project in a timely fashion.

STEP	TOOLS	OUTPUTS
<p><b>DEFINE the project</b></p> <ul style="list-style-type: none"> <li>• Develop a clear project definition.</li> <li>• Develop organizational change plans, risk management plans, and project plans.</li> </ul>	<p><u><b>Market Analysis Tools:</b></u>  Mkt. Forecasting Tools;  Customer Value Analysis;  Technology Fore. &amp; Visioning;  Competitor Analysis.</p> <p><u><b>Process Analysis Tools:</b></u>  Control Charts;  Pareto Charts.</p> <p><u><b>Project Planning Tools:</b></u>  Work Breakdown Structures;  PERT Charts;  Gantt Charts;  Activity Network Diagrams.</p> <p><u><b>DMADV Specific Tools:</b></u>  Project Charter;  In/Out of Scope Tool;  Organizational Change Plan</p>	<p>Project Charter</p> <p>Project Plan</p> <p>Organizational Change Plan</p> <p>Risk Management Plan</p> <p>Tollgate Review &amp; Storyboard Presentation</p>

STEP	TOOLS	OUTPUTS
<p><b>DEFINE the project</b></p> <ul style="list-style-type: none"> <li>• There is a need for a new kind of rebar which can withstand harsher weathering.</li> <li>• We would like to have this project completed in 5 years</li> </ul>	<p><u>Market Analysis Tools:</u> The market has a large demand for this product and we forecast that it will take 10 percent of the market share once released and 5 additional percent the next 10 years.</p> <p><u>Project Planning Tools:</u> Gantt Chart;  Risk Management, best/worst case scenarios</p>	<p>Gantt Chart</p> <p>Idea of where/when to deploy in the market</p> <p>Risk Management plan</p>

STEP	TOOLS	OUTPUTS
<p><b>MEASURE</b></p> <p><b>Customer Req.</b></p> <ul style="list-style-type: none"> <li>•Collect VOC (voice of customer) Data</li> <li>•Translate the VOC into design requirements - CTQs</li> <li>•Identify the most important CTQs.</li> <li>•Revise Risk Management Plan</li> <li>•If necessary, develop a multistage project plan.</li> </ul>	<p>Cust. Segmentation Tree</p> <p>Data Collection Plan</p> <p>Customer Research Tools: Interviews; Contextual Inquiry; Focus Groups; Surveys.</p> <p>VOC Table</p> <p>Affinity Diagrams</p> <p>Kano Model</p> <p>Perform. Benchmarking</p> <p>QFD (quality function deployment) Matrix or house of quality</p> <p>CTQ (critical to quality) Risk Matrix</p> <p>Multistage Plan</p>	<p>Prioritized CTQs</p> <p>Updated risk management plan and multistage project plan, if appropriate.</p> <p>Tollgate Review &amp; Updated Storyboard</p>

STEP	TOOLS	OUTPUTS																		
<p><b>MEASURE</b> <b>Customer Req.</b></p> <ul style="list-style-type: none"> <li>Customer wants: <ul style="list-style-type: none"> <li>-Strong product</li> <li>-One that lasts a while</li> <li>-One that meets their building specs</li> </ul> </li> <li>This Means: <ul style="list-style-type: none"> <li>-No decrease in overall Strength</li> <li>-High yield Strength</li> <li>-Corrosion Resistance</li> <li>-Long Life Cycle</li> <li>-Specific Chemistry</li> </ul> </li> </ul>	<p>Customer Interviews Surveys.</p> <p>VOC Table</p>  <table border="1"> <caption>VOC Table Data</caption> <thead> <tr> <th>Category</th> <th>Company estimates</th> <th>Customer feedback results</th> </tr> </thead> <tbody> <tr> <td>Chemistry of steel</td> <td>42</td> <td>18</td> </tr> <tr> <td>Yield Strength</td> <td>6</td> <td>2</td> </tr> <tr> <td>Corrosion resistance</td> <td>10</td> <td>60</td> </tr> <tr> <td>Overall strength</td> <td>14</td> <td>7</td> </tr> <tr> <td>Life-cycle</td> <td>30</td> <td>14</td> </tr> </tbody> </table> <p>House Of Quality</p>	Category	Company estimates	Customer feedback results	Chemistry of steel	42	18	Yield Strength	6	2	Corrosion resistance	10	60	Overall strength	14	7	Life-cycle	30	14	<p>Voice of Customer is heard and accounted for</p> <p>Prioritized CTQs</p> <ul style="list-style-type: none"> <li>-Corrosion Resistance</li> <li>-Specific Chemistry</li> <li>-Life Cycle</li> <li>-Overall Strength</li> <li>-Yield Strength</li> </ul>
Category	Company estimates	Customer feedback results																		
Chemistry of steel	42	18																		
Yield Strength	6	2																		
Corrosion resistance	10	60																		
Overall strength	14	7																		
Life-cycle	30	14																		

# House of Quality

<div style="border: 1px solid black; padding: 5px; text-align: center;">           Strong 9    Moderate 3    Weak 1             WEIGHT   <b>Customer Needs</b> </div>							Priority Score	
		Visual Inspection	Spectrometer Testing	Tensile Test	Hardness Test	Carbon Content Test		Billet Weighing System
Shiny Finish		9	3	1	1	1	1	2
Smooth to Touch		9	1	1	1	1	1	2
Strength		1	9	9	9	9	1	10
High Yield Strength		1	9	9	9	9	1	9
Consistent Color		9	1	1	1	1	1	2
Corrosion Resistance		1	9	1	1	1	1	12
Long Life Cycle		1	9	9	9	9	1	11
Tight Tolerances		3	3	1	1	1	9	9
Customer Specific Chemistry		1	9	1	1	3	1	12
CTQ Priority Score		35	53	33	33	35	17	
Target Limits		Smooth & shiny finish, no defects	Specific to product or customer. (usually High Carbon)	250MPA yield strength 400MPA ultimate strength	About 120 HB	Customer specific, between 0 and 4 percent	Not below 3515 lbs, above several pounds is ok	

STEP	TOOLS	OUTPUTS
<p><b>ANALYZE</b> <b>Concepts:</b></p> <ul style="list-style-type: none"> <li>•Generate, evaluate, and select the concept that best meets the CTQs within budget and resource constraints.</li> </ul>	<p>QFD Matrix: <u>Creativity Tools:</u> Brainstorming/ Brainwriting; Analogies; Assumption Busting; Morphological Box. Pugh Matrix Tollgate Review Forms</p>	<p>Selected concept for further analysis and design</p> <p>Tollgate Review &amp; Updated Storyboard</p>

STEP	TOOLS	OUTPUTS
<p><b>ANALYZE</b></p> <p><b>Concepts:</b></p> <ul style="list-style-type: none"> <li>•Generate good ideas with brainstorming and then get rid of the ones that don't work</li> </ul>	<p><b><u>Brainstorming:</u></b></p> <p>To get the performance we could:</p> <ul style="list-style-type: none"> <li>-Use high carbon steel</li> <li>-Use a galvanized coating</li> <li>-Use Stainless Steel</li> <li>-Use composites</li> </ul>	<p><b><u>Select a few concepts for further review:</u></b></p> <ul style="list-style-type: none"> <li>-High carbon steel is a good idea</li> <li>-Galvanized coating is a good idea</li> <li>-Stainless steel is 400 times the cost</li> <li>-Composites will fracture</li> </ul> <p><b><u>Pass:</u></b></p> <ul style="list-style-type: none"> <li>-Stainless Steel</li> <li>-Galvanized coating</li> </ul> <p><b><u>Fail:</u></b></p> <ul style="list-style-type: none"> <li>-Composites</li> <li>-Stainless Steel</li> </ul>

STEP	TOOLS	OUTPUTS
<p><b>DESIGN the product</b></p> <ul style="list-style-type: none"> <li>• Develop the high-level and detailed design.</li> <li>• Test the design components.</li> <li>• Prepare for pilot and full-scale deployment.</li> </ul>	<p>QFD Matrix</p> <p>Simulation</p> <p>Prototyping</p> <p>Design Scoreboard</p> <p>FMEA / EMEA</p> <p>Planning Tools</p> <p>Process Management Chart</p> <p>Tollgate Review Forms</p>	<p>Tested and approved high-level design</p> <p>Tested and approved detailed design</p> <p>Detailed updated risk assessment</p> <p>Plans for conducting the pilot</p> <p>Completed design reviews and approvals</p> <p>Tollgate Review &amp; Updated Storyboard</p>

STEP	TOOLS	OUTPUTS
<p><b>DESIGN the product</b></p> <ul style="list-style-type: none"> <li>• Develop the high-level and detailed design.</li> <li>• Test the design components.</li> <li>• Prepare for pilot and full-scale deployment.</li> </ul>	<p>Prototyping</p> <p>Planning Tools</p> <p>Process Management Chart</p>	<p>Tested and approved detailed design</p> <p>Build Proper facilities for deployment, modify current equipment</p> <p>Updated risk assessment, worst/best case scenarios for product deployment using updated and tested information.</p> <p>Reviews and Approvals</p>

STEP	TOOLS	OUTPUTS
<p><b>VERIFY Design Performance</b></p> <ul style="list-style-type: none"> <li>• Conduct the Pilot and Stress Test and Debug the Prototype</li> <li>• Implement the Design</li> <li>• Transition Responsibility to the Appropriate People in the Organization</li> <li>• Close the Team</li> </ul>	<p><u>Planning Tools</u></p> <p><u>Data Analysis Tools:</u> Control Charts; Pareto Charts</p> <p><u>Standardization Tools:</u> Flowcharts; Checklists; Process Management Charts</p>	<p>Working Prototype with Documentation</p> <p>Plans for full implementation</p> <p>Control Plans to Help Process Owners Measure, Monitor, and Maintain Process Capability</p> <p>Transition Ownership to Operations</p> <p>Completed Project Doc.</p> <p>Project Closure</p> <p>Final Tollgate Review &amp; Updated Storyboard</p>

STEP	TOOLS	OUTPUTS
<p><b>VERIFY Design Performance</b></p> <ul style="list-style-type: none"> <li>• Debug the Prototype</li> <li>• Implement the Design</li> <li>• Transition from R&amp;D to actual production line</li> </ul>	<p><u>Standardization Tools:</u></p> <p>Flowcharts; Checklists; Process Management Charts.</p>	<p>Working Prototype with Documentation</p> <p>Plans for full implementation</p> <p>New Engineering Controls</p> <p>Project Closure</p>
