The Grand Lodge of Cuba in the Second Half of the XX Century:
A Historical and Statistical Examination of a Unique Niche

Jorge Luis Romeu, Ph.D.
Research Professor, Syracuse University, NY/USA.
Member, Jose Celso Barbosa Lodge No. 106, Puerto Rico.

Final Draft: March 10, 2014

Abstract

We present a statistical and historical analysis of the development of the Grand Lodge of Cuba (GLC) during 1945-2010, based on our demographic study of this Institution. Research identifies and evaluates several important factors that have contributed to membership growth and decline, in the second half of the XX Century. Important characteristics of the Institution are then identified and discussed, as they relate to historical developments. Finally, Freemasonry in Cuba has been unique in its acceptance under a communist regime. We examine how this has come about; and to what extent were particular persons or policies responsible for such singular development.

Keywords: Freemasons, Cuba, XX Century, demographic analysis, totalitarian societies

---

1 The first part of this paper summarizes the demographics of GLC, presented to the International Conference on American and Latin American Freemasons (Los Angeles, CA, December 2011), sponsored by UCLA History Dept. and the Grand Lodge of the State of California. A version of it was published, with all conference papers, in a special issue of the journal REHMLAC. The second part of this paper, discussing how GLC came to be and exists in Cuba, under a Marxist regime, was especially written for Ars Quatuor Coronatorum (AQC).

2 Dedication: to my father, a lifelong Cuban Mason, who inspired me to become one.
1.0 Introduction

During the second half of the XX Century, Cuba and its Freemasons have lived through very difficult times. These included a pluralistic phase (1944-1952), Fulgencio Batista’s dictatorship (1952-58), the advent of the Cuban revolution up to the disintegration of the Soviet Union (1959-89), developments after the loss of Soviet and other socialist countries economic subsidies (1989-2007), and developments after General Raul Castro took over the government (2006) from his ailing, older brother Fidel.

The present paper pursues two objectives. First, to overview, using a demographic approach, the evolution of the Grand Lodge of Cuba (GLC) during the second half of the XX Century. Second, to identify and analyze several important characteristics of Cuban Freemasons that help explain the manner the GLC has survived in the Cuban Marxist regime.

This analysis addresses two important research questions. First why, if in any way, is the GLC still relevant, and, how does it fit within the rest of Cuba’s contemporary Civil Society (CS). Secondly, how has the GLC evolved during the second half of the XX Century, what difficulties has it found to survive in this singular society, and what solutions has it implemented.

GLC, over 150 years old, is one of the oldest organizations of Cuban CS. With about 30,000 members nation-wide, in over 300 lodges in almost every town, it is one of the largest and most widely distributed Cuban organizations. It has traditionally admitted members of all races, social classes, political persuasions, and religions. Finally, the GLC, directly or through its members, has traditionally participated in Cuba’s political, economic and social life.

The scope of our research and of our data analysis is limited to the GLC; that is 1st, 2nd and 3rd degrees masons. We will not discuss the origins of Freemasonry in this paper. For the history of Cuban Freemasons during the XIX Century, readers are referred to Bro. Aurelio Miranda. For more recent developments, readers are referred to Dr. Torres-Cuevas.

---

3 In 2010, out of the 29,000 members of the GLC, 4,213 of them, or 14.5% had obtained higher degrees. Annual Message for 2011-12. I.P.H. Lázaro F. Cuesta Valdés 33. SGC (p.s.r) of the Supreme Council, 33 Degree.

Part I

2.0: Demographic study of the Evolution of GLC in the 2nd half of the XX Century

2.1 Summary of our previous work

Our initial demographic study of the GLC, found in Romeu⁶, discusses the period 1945-1980. Its second part, found in Romeu⁷, discusses the period 1980-2010. In this section, we summarize the main results of these two studies.

Figure 1 presents the graph of yearly membership of GLC, 1948-2010, showing Total and Effective⁸ masons. Data from GLC were obtained through Bro. Gustavo Pardo Valdes, at the time, President of the Academy of Higher Masonic Studies of the GLC. Pardo obtained them from the Grand Secretary of GLC. These data were strictly validated by comparing them to various sources such as the Web Page and several publications of the GLC, as well as to the data in several publications by Torres-Cuevas, Fernandez-Callejas⁹ and other well-known researchers¹⁰. Population data were obtained from Cuban Censuses¹¹. The ensuing extensive statistical analysis¹² has formed the basis of several academic research papers¹³.

Figure 1. Yearly membership in the GLC: A) Total Members; B) Effective Masons.

---

⁸ Effective Masons: a statistic developed by the author to standardize (i.e. compare across time and space) the data. Yearly total masons are divided by one fourth of the corresponding total population (for, females and men younger than 21, and men with criminal records and serious physical and mental disabilities, cannot become Masons).
¹⁰ Romeu, REHMLAC, Section 2: Data Validation.
In both panels of Figure 1, one observes three distinct cycles. The first two, from 1945 to 1959, and from 1959 to 1980, are analyzed in REHMLAC paper. The third cycle, from 1980 to 2010, is analyzed in CEHME paper. In turn, each of these cycles can be decomposed into periods, characterized by specific social, political and economic events. To help answer the research question “what happened during these years?” we compared the GLC time series with their concurrent historical events. Serial change points were used to identify the beginning and the end of cycles, and the periods defined.

To illustrate data characteristics we give in Table 1, for selected years, GLC membership and number of lodges, with their corresponding Total Cuban population and Effective Masons.

We also developed and fitted a statistical model\(^\text{14}\) that helps explain the data variation:

\[
\text{Members CurrentYear} = \text{Members PreviousYear} - \text{Losses} + \text{Gains}
\]

Losses = Withdrawals + Politically-Motivated + Deaths

Gains = New members (affiliations) + Re-affiliations

\(^{14}\) Identified in footnote 13
Withdrawals refer to masons who became disillusioned and left the GLC. Politically-motivated losses include: (1) emigration caused by the 1959 revolution; (2) demits (or never joining) GLC due to government policies\(^{15}\); and (3) demits (or never joining) GLC because the new revolutionary ideology was more attractive than that of Freemasonry. Model results, discussed at length in the mentioned papers, were satisfactory. Thence, they support the plausibility of the above-stated hypotheses, upon which such model was developed.

In the 1990s GLC membership growth rates tripled, after (1) IV Communist Party Congress allowed its members to join it, and (2) non-government jobs in tourism increased\(^{16}\).

Source: Yearly reports from the Grand Secretary and author’s calculations

Table 3 shows two membership estimations: using growth rate 0.01 (in 1980 decade) and rate 0.03 (1990s). Growth comparison shows a relative increase of 5127 new members in year 2000, who would have not joined the GLC had growth rate remained that of the 1980s.

Table 4 shows how GLC membership stabilized at about 29,000 during the first ten years of the XXI Century. Notice a yearly churn (members joining and leaving the GLC) of about 10%. After over a decade of such high turnover, the make-up of present-day GLC membership may be very different from that of the 1980s, or even before.

\(^{15}\) During the early years of the revolution the government developed a policy to obtain adherence to its cause, characterized by Fidel Castro’s phrase “Within the Revolution, everything, outside the Revolution, nothing”. 

\(^{16}\) This increasing GLC membership trend differs markedly from decreasing trends that existed in other countries, such as the USA, during these same years.
The wide geographical distribution of GLC members is illustrated via provincial data, shown in Table 5. Notice how, in each of Cuba’s fourteen provinces there are multiple lodges. Metro Havana captures one third of all lodges and members, and the four provinces closer to Metro Havana\textsuperscript{17} account for over half of the membership of GLC. Also, notice how predominantly urban provinces have a higher concentration of lodges and masons (i.e. Effective Masons indicator) than more rural ones.

\textit{Source: Reports from the Grand Secretary, GLC and author’s calculations}

\textsuperscript{17} Pinar del Rio, Havana Province, Matanzas and Villa Clara
Based on the analyzed data, events and model, key characteristics were identified for each period. They are discussed in detail in the mentioned papers, and summarized below:

**Period 1945-1959:** doubling of GLC membership was possibly impacted by a strong post-war economy, and the growth of urban middle classes, which nurtured a large segment of members\(^{18}\). **Period 1959-1980:** 40% decrease, largely among young and professional members was possibly impacted by wide state control of Cuba’s economic life, which triggered strong emigration, many demits and few affiliations. **Period 1980-1992:** end of accelerated decline, and the beginning of a slow growth was possibly impacted by new possibilities of self-employment and a more relaxed governmental policy (the first political dissenters appeared). **Period 1992-2000:** accelerated growth, with more young and professional members, was possibly impacted by the 1991 Cuban Communist Party Congress decision to allow members to join religious and fraternal organizations\(^{19}\), and vice-versa, as well as by greater self-employment opportunities generated by the growth of international tourism. **Period 2000-2010:** stabilization at 29,000 members was possibly due to member saturation, as well as by government liberalization in several political, social and economic areas, introduced by the new administration of General Raul Castro\(^{20}\).

Our overall conclusion, from observing 65 years of GLC evolution, is that the degree of state control over the economy and the educational establishment, which can seriously affect private citizens’ opportunities for advancement (e.g. for studying and working), in a country where the young could not emigrate\(^{21}\), was a key factor in the (positive or negative) demographic changes in Cuba’s Freemasonry, during the second half of the XX Century.

### 2.2 Some Relevant Characteristics of Cuban Freemasons

---

\(^{18}\) A similar phenomenon occurred in the United States and other countries, during this period.

\(^{20}\) *Revolution in Retreat.* *(The Economist)* Vol. 402, No. 8777. III/24/2012. Special Report). Raul, in 2006 replaced his brother Fidel as president. Examples of (1) economic changes: state land leased to private farmers; (2) political changes: limitation to two terms of five years, for heads of state (Fidel Castro had led Cuba, under several titles, for 47 years); (3) social changes: Mariel Castro has defended the civil rights of previously ostracized homosexuals.

\(^{21}\) Emigration, overwhelmingly to the USA, ended after the *October 1962 Missile Crisis*. It restarted (1966-71) with the *Freedom Flights* (Varadero, Cuba to Miami, Florida). The Cuban government prohibited males aged 14 to 27, to leave the country (citing military age). No emigration was allowed between 1972, or after the *1980 Mariel Boatslift*. 

---
Section 2.1 showed how, in the second half of the XX Century, GLC membership went from accelerated growth (1945-1959), to accelerated decay (1960-1980), to stabilization (1981-1991), and finally again, to accelerated growth (1992-2010) and membership stabilization\textsuperscript{22}, and we identified several factors affecting such evolution. In this section we discuss several characteristics that make GLC, as an organization, particularly interesting.

*Inclusion* makes GLC\textsuperscript{23} a singular organization. It admits male members from all religions\textsuperscript{24}, races\textsuperscript{25}, walks of life\textsuperscript{26}, socio-economic strata\textsuperscript{27}, regions of the country\textsuperscript{28} and political persuasions\textsuperscript{29}, becoming a cross-cut of Cuban society\textsuperscript{30}.

Freemasons are egalitarian: all Master Masons (MM) enjoy the same rights and obligations. Lodges are democratic: its officers are elected, and every MM can aspire to hold any position in the lodge. Sessions are participative; any MM has the possibility of respectfully arguing for, or against, any statement or proposal made in lodge.

GLC has a tradition of active *participation in civic life*. In the late XIX Century many GLC officers became leaders in Cuba’s autonomic movement\textsuperscript{31}. In the XX Century, many others were leaders in political, educational and social activities, for GLC provided those wanting to participate outside political parties, an opportunity to do so\textsuperscript{32}.

\textsuperscript{22} After 1992, we find ten years of intense turn-over in the membership, both in initiations and demits. By the year 2003, almost as many new members had joined (and perhaps left) the GLC, as there were in 1980.
\textsuperscript{23} Other Grand Lodges may incorporate specific characteristics of their respective countries and communities.
\textsuperscript{24} Most masons are Catholic, the prevalent Cuban religion, others are Protestant, some practice Afro-Cuban religions, and a few are Jewish.
\textsuperscript{25} Since the start of Cuba’s first War of Independence, in 1868, lodges admitted non-whites. GLC has traditionally been racially integrated. Currently, the Grand Commander of the Supreme Council, as well as many lodge officers and members of the Grand Line are Afro-Cuban.
\textsuperscript{26} In most every lodge one finds factory workers, employees, technicians, as well as college professionals.
\textsuperscript{27} Predominantly from working and professional lower and middle classes.
\textsuperscript{28} There are over 300 lodges in almost every town, throughout the country.
\textsuperscript{29} Includes members of the Cuban Communist Party, government officials and security apparatus (Past GM Collera Vento was such a member); internal dissenters and ex-political prisoners (Hector Maseda, 33, a member of the Supreme Council, is a dissident ex-political prisoner), as well as non-political citizens.
\textsuperscript{30} Women have a separate organization, *Acacias*; and the young had another one, *AJEF*, which was closed in 1966.
\textsuperscript{31} Dominique Soucy y Delphine Sappez. “Autonomismo y Masonería en Cuba” REHMLAC. (Vol.1, No. 1. 2009).
\textsuperscript{32} See Torres-Cuevas, 64 and 65.
For example, Grand Masters Regüeíferos, Llansó Simoni, Llansó Ordoñez and Muñoz Sañudo were civic and economic leaders; Wolter del Río and Santos Jimenez were university professors and cabinet ministers; Iraizoz, was a prominent newspaper editor.

GLC philosophy and involvement in civic life is best described in a book edited under Grand Master Santos Jiménez’s tenure: *(Freemasonry) does not intend to impede the struggles for the different ideals that exist among men, but to seek that everyone may be able to defend one’s principles, against the principles of others, without using any other weapon than reason, and without bringing to the struggle any other pursuit than the noble desire of seeing their ideals succeed, based upon their own merits. (Freemasonry) does not pretend to castrate the human thought, but on the contrary, to energize it in such a way; that it is no longer necessary to use imposition by force to succeed*33.

*Other important characteristics* that complement Freemasonry’s ethical teachings, developed by active participation in lodge include fostering of reading habits34, honing of organization skills and democratic methods of leadership, managing and living within a budget, effective pubic speaking, the art of listening and arguing respectfully, of negotiation based upon persuasion and reason, and abiding by a system of rules and regulations. Such characteristics definitely contribute to prepare good civic leaders35.

Finally, Freemasons constitute a *Fraternity* where Brothers must exercise *Tolerance*36. These two characteristics have helped *develop open and free forums* where, through *interaction* (social capital), peaceful and productive exchanges of ideas occur37.

Because of its fraternal and tolerance principles, lodges become *incubators of novel organizations and ideas*, where members discuss divergent views, cross-fertilizing each other. This may well be Freemasonry’s most important contribution to Civil Society.

---

34 In addition to degree liturgies and catechisms, Masons read books on history, rituals, philosophy, etc.
35 See Torres-Cuevas, 78 and 162.
36 Other Brethren such as Keith Sheriff, of St. John’s Lodge, Gibraltar, and this author, believe that *Tolerance* is not enough, these days. And that *Acceptance* should be the contemporary attitude.
37 In Cuba and Puerto Rico, during the end of the XIX and start of the XX Century, the main leaders of autonomist parties, and of liberal ideological currents, were Masons and interacted in their Lodges.
Summarizing, there are three key functions that Freemasonry, and thence GLC, provide to society: (1) the connecting function\textsuperscript{38}, (2) the disseminating function\textsuperscript{39}, and (3) the incubating function\textsuperscript{40}. Precisely because of these characteristics, some political regimes have encouraged the development of Freemasonry, while others have, openly or discreetly, opposed it.

2.3 Cuban Freemasons and Civil Society

Cuban civil society (CS) is a topic that has long interested this researcher\textsuperscript{41}, for CS and the GLC are closely related.

It is worth noting how GLC was not barred in Cuba, a one-party Marxist state, when pre-revolutionary CS was disbanded after the 1959 revolution\textsuperscript{42}. Such occurred in Nazi Germany, in Fascist Spain and Italy, and in Marxist Soviet Union, all of them also one-party, ideological states\textsuperscript{43}. Such exception constitutes a unique case in modern history.

Why was GLC spared? This excellent research question requires consideration of several factors: (1) GLC civic and patriotic trajectory, (2) widely acknowledged among Cubans, and (3) GLC heterogeneous membership, as well as (4) its important international connections\textsuperscript{44}. Finally, GLC came, after 1960, under (5) indirect government control, through obligatory measures\textsuperscript{45}.

After the 1990 collapse of the Soviet Union and the European Eastern Block, Cuba lost their economic subsidies, plunging it into a severe crisis. Cuba turned to international tourism as a source of income. At the same time, Cuba’s CS began revamping, with hundreds of new Non-Governmental Organizations (NGOs)\textsuperscript{46} exerting a growing influence in daily life.

\textsuperscript{38} Lodges help Masons establish new contacts, thus fostering interaction among its members.
\textsuperscript{39} Lodges help Masons spread new ideas among their Lodge members, and members of other lodges.
\textsuperscript{40} Lodges foster the creation of other organizations that implement useful and new ideas.
\textsuperscript{42} Other institutions such as Rotary, Lions, Boy Scouts and the Catholic Youth, were disbanded shortly after 1959. Some Cuban Masons fearing GLC would follow suit, emigrated and founded exile masonic institutions in the USA.
\textsuperscript{44} Such as Presidents Truman, of USA, Lazaro Cardenas, of Mexico, and Salvador Allende, of Chile.
\textsuperscript{45} GLC was supervised by the Office of Religious Affairs of the Cuban Communist Party, which required lodges to submit detailed session reports, with names of attendees and topics of debate, under severe fines, and surveillance through overt and covert members of Cuban security apparatus, such as Past Grand Master Collera Vento.
One of the most prominent was the Catholic Church (CCH). Directly through its dioceses and parishes, or through Caritas47, its international charitable organization, CCH began creating religious, social and educational programs48 as well as reviving old ones. Internet publications appeared49, edited by the Dioceses50, in particular that of Havana51. The relevance of CS and CCH organizations has increased under President Raul Castro. For example, in 2010 Cardinal Jaime Ortega was instrumental in releasing Cuban political prisoners52. The above provides a roadmap for activities that GLC can undertake to contribute to CS and enhance its status53.

GLC fulfills the three conditions in CS definition54. It is (1) independent of the state; (2) its membership is voluntary, and (3) its goals are advanced through peaceful means. As one of the oldest, largest, and geographically expanded CS organizations, GLC has an important role to play.

Some of the contributions GLC could offer CS can be better understood by referring to the beginnings of Freemasonry, in early XVII and XVIII Century England. Then, masonic lodges were conceived as embryos of an emerging CS. Such ideas, thoroughly discussed in Margaret Jacob’s Living the Enlightenment55, are still valid today.

Jacob affirms that “Lodges were spaces in a new zone of civil society”56, that “occupied a middle ground” in this society, where “some men and a few women sought to express those ideals sociably”57. Therefore, lodges constitute a forum for novel ideas that perhaps couldn’t be shared as freely in other established social forums.

Jacob continues stating that “First and foremost, lodges were schools of government”\(^{58}\), ruled by *constitutions*, whose officers are democratically elected among their peers\(^{59}\). Jacob then states that lodges foster “the creation of constitutionally governed civil societies”\(^{60}\), where merit (i.e. *personal achievement*) “is the sole criterion for status within the Lodge”\(^{61}\).

Jacob discusses the *egalitarian*\(^{62}\) Masonic concept of ”promotion within the lodge as grounded upon real worth and personal merit only”\(^{63}\), instead of based on rank or wealth that an individual holds in society, often inherited.

All above ideas, which were revolutionary and dangerous in 1717, may still be today in some societies and may help explain the rapid growth of GLC, after 1990. Before then, some citizens, who later became economically independent of the state, would not have joined GLC before then. And some others, considered by *official* agencies\(^{64}\) to be insufficiently qualified to join the higher structures because unwelcome personal values\(^{65}\), may have sought acceptance in GLC. Such was the attitude, in the XVIII Century, of individuals who were also unfavorably considered by their official society.

**Part II**

**3.0 How Cuban Freemasons continue to operate in the Cuban Marxist regime.**

Three excellent questions have been proposed: (1) how was the GLC able to flourish in Catholic Cuba, first under Spain, and later, after independence; (2) how was GLC able to continue to exist under Castro’s Marxist regime, when Freemasonry was banned under Fascist and Nazi regimes, and other totalitarian dictatorships; and (3) how, if in any way, has the Castro regime tried to use GLC to pursue its policies, in the way as Napoleon Bonaparte tried to use Freemasonry to consolidate his expanding Empire, in the France of early 1800s?

3.1 How was the GLC able to flourish in Catholic Cuba?

Under Spain, Cuba was never as Catholic as other larger and richer Spanish colonies. Cuba, Puerto Rico and Santo Domingo were poor and scarcely populated islands until after 1790. Then, two events occurred: (1) Haiti’s slave revolt provided the opportunity to take over Haiti’s sugar cane production, and (2) Spain lost all other, richer, American colonies to independence.

By then, Cuba and Puerto Rico had developed a weak CCH, whose bishops and Spanish priests often complained about lack of fervor, and who identified with Spanish interests. For, during Cuba’s colonial era, as well as during its wars of independence, CCH and many of its priests supported Spain. At the start of Cuba’s two independence wars, Havana’s Bishops published edicts requesting priests to support Spain (June of 1869), and exhorting the flock to combat the rebels (June of 1895).

Cuban Catholicism and anti-clericalism were milder than those of Spain or Mexico, both before and after independence. This allowed Freemasonry to flourish in Cuba.

3.2 How did the GLC continue to exist under Castro?

Freemasonry was banned by Stalin, Hitler, Mussolini, and Franco. Why was GLC not disbanded by the government, as were other Cuban CS pre-revolutionary organizations? The answer requires considering three issues: (1) the long and distinguished history of GLC, (2) the singular nature of Cuba’s Marxist regime, and (3) the unorthodox approaches the Cuban government applied to effectively control GLC.

3.2.1 The long and distinguished history of the GLC

We consider the history of the GLC only after 1859, when Andres Cassard arrived in Santiago de Cuba with instructions from Grand Commander Pike, of the Mother Supreme Council in Charleston NC, to organize Gran Orient de Colon. Before 1859, Cuba enjoyed few

71 Miranda 126, and Torres-Cuevas, 55-56.
and short periods where Freemasonry was allowed\textsuperscript{72}. Its first lodges included wealthy and aristocratic Cubans and Spaniards\textsuperscript{73}. In addition, several para-masonic secret societies, seeking independence\textsuperscript{74}, were created. However, between 1835 and 1859, masonic activities in Cuba were prohibited and lodges were dissolved\textsuperscript{75}.

Two years after Bro. Cassard created the Supreme Council in Santiago, Pike sent Vicente Antonio DeCastro\textsuperscript{76} to redress some problems that had arisen\textsuperscript{77}. Instead, Bro. DeCastro created GOCA\textsuperscript{78}, an openly pro-independence order\textsuperscript{79}. After 1862, GOCA lodges spread throughout Cuba, disbanding in 1868, shortly before the first independence war\textsuperscript{80}. In early 1870, 23 out of the 30 lodges under Gran Logia de Colon, suspected of sympathy with Cuban rebels, were closed by the colonial government\textsuperscript{81}. Grand Master Puente Badell, of Gran Logia de Colon, and nine of his officers, were sequestered and murdered on February of 1871, in San Juan de Wilson, near Santiago\textsuperscript{82}. This illustrates the degree that Spanish colonial authorities suspected and feared the activities of autochthonous masonic lodges.

However, not all lodges were composed of a majority of Cubans, nor sympathized with independence. After the 1868 revolution that deposed Spanish Queen Isabella, Freemasonry was again allowed in Spain, and several Spanish Obediencias finally appeared in Cuba and Puerto Rico\textsuperscript{83}, organizing lodges that competed with already-established autochthonous\textsuperscript{84} ones.

\textsuperscript{72} E.g. when French masons arrived from Haiti, or during the Spanish Revolution of 1820-1823.

\textsuperscript{76} Freemason and renowned medical doctor.

\textsuperscript{77} Personal rivalries in the Supreme Council, and resentments due to dependence of GLC on Supreme Council.

\textsuperscript{78} Gran Oriente de Cuba y las Antillas. Torres Cuevas, 57-61 and 110-127; Miranda 164.

\textsuperscript{79} Considered irregular because of its strong political views. See Miranda, 131; Torres-Cuevas, 70.

\textsuperscript{80} Tinima, Redencion and Buena Fe lodges included many of the organizers and generals of the war of 1868-78 such as Agramonte, Cespedes, Maso, Aguilera, Gomez and Maceo. Miranda, 276-277; Torres Cuevas, 176.

\textsuperscript{81} See details on Cuban lodge closings in Castellano Gil, 263.

\textsuperscript{82} Miranda, 313-354, dedicates an entire chapter to the murder of GM Puente Badel. Torrez-Cuevas, 61, and Murphy, History of Freemasonry in Cuba also discuss this.

\textsuperscript{83} The Spanish Obediencias were organized several years after authoctonous ones: GOE (Gran Oriente Español), GONE (Gran Oriente Nacional de España), GODE (Gran Oriente de España), GLS (Gran Logia Simbolica).

\textsuperscript{84} Lodges chartered by the Supreme Council in Charleston, and formed mainly by Cuban or Puerto Rican nationals.
Consequently, two conflicting masonic factions arose in Cuba and Puerto Rico: one, mainly populated by Spaniards, supported centralization from Madrid; another, filled mainly by Cubans and Puerto Ricans, supported decentralization (autonomy or independence).

Spanish Obediencias did not favor autonomy or independence. Castellano Gil states how these “were contrary to segregationist movements”, adding that “members of Spanish lodges (...) are considered advanced guardians that watch for the integrity of the fatherland”. Furthermore, Spanish Orientes “demanded from all their affiliates in Cuba, Puerto Rico and the Philippines, proof of their pro-Spanish sentiments”.

After Cuba’s 1868-1878 independence war was lost, remnants from GOCA and other masonic groups, united under Gran Logia Unida de Colon e Isla de Cuba. Antonio Govin, its newly elected Grand Master, with other Grand Lodge officers and members, founded the Autonomist (Liberal) Party to peacefully seek for Cuba a status similar to that of Canada within Britain. This alternative had been unsuccessfully pursued by several Cuban leaders since early 1800s. The Autonomist party published several newspapers, developing a solid ideological struggle until the start of the War of 1895.

Cuba’s last War of Independence was organized by Jose Marti, and led by generals Gomez, Maceo and Garcia, all Masons. The American Intervention government of 1899-1902, included several cabinet ministers who were Masons. Cuba’s first president, Estrada Palma, its third vice-president, its fifth president, and scores of political, economic, educational and social leaders were all Masons. In Puerto Rico, the majority of cabinet ministers in the autonomist government under Spain as well as many leaders after the US intervention were also Masons.

90 Castellano Gil, 287.
91 Formed with GOCA, Grand Oriente de Colon, and other lodges. Torres-Cuevas, 170-174; 188-191.
92 Among them Caballero in 1807, Varela in 1820, and Jose A. Saco throughout most of the XIX Century.
93 Simultaneously, Puerto Rican Freemasons helped found their own Liberal Autonomist Party.
94 Among them Munoz-Rivera, DeDiego, Barbosa, Coll y Toste, and Fernandez-Juncos.
Many historians have recognized the significant contributions that Freemasons have made to Cuba’s economic, political and independence struggles, as well as to its social and educational advancement, especially in leaders and ideas. Such fact is implicitly supported by the actions of Spanish authorities, who systematically suppressed autochthonous lodges. For example, in 1895 “Spanish Governor Callejas suspended all masonic activity in Cuba.” Evidently, Freemasons’ contributions in leaders and ideas have been disproportionally larger than the size of all Masonic institutions with respect to Cuba’s general population.

In spite of such evidence, some historians strongly disagree. Castellano Gil, for example, opines that “individual behavior of a Mason should be separate from the theoretical thought of the institution.” Castellano states that, since not all independence leaders were Masons, nor all Masons supported Cuba’s independence or autonomy, Freemasonry as an institution should not get credit for activities of some of its members.

It is unreasonable to expect Masons to develop partisan political activity within, or in the name of, their Lodges. First, such activity is prohibited in Masonic constitutions. Secondly, Freemasonry is not a political party. Such historians miss the real Freemasons’ contributions, which consisted in grooming and connecting leaders, and polishing and distributing their ideas, something that Spanish authorities and their military understood well, and which triggered, among other atrocities, the 1871 murder of GM Puente Badell, reviewed in our Section 3.2.1.

It is noteworthy to point out how Castellano Gil, whose well-documented book quotes extensively Miranda and Torres-Cuevas, fails to acknowledge this event, and only indirectly alludes to it in his footnote 454, on page 271.

Grand Master Wolter del Rio, explained the nature of masonic contributions, in his 1930 message: *Freemasonry, as an Institution, is one of doctrinaire and not of material activity (...). We discuss principles in an abstract order (...) without deriving concrete cases or conclusions because, as an Institution, we cannot do this. Every Brother individually, with the teachings,*

---

95 The First National History Congress, organized by the Cuban-International Society of Historical Studies of the Office of the City Historian of Havana, celebrated 8th – 12th October 1942, recognized Cuban Freemasonry as the Institution that “has contributed more elements towards the Independence, freedom, culture and progress of Cuba”.
96 Torres-Cuevas. 78-79.
98 Castellano Gil, 267. For more opinions on historical interpretations by masonologos, see pages 16 and 24.
99 Both these Cuban historians discuss Puente Badell in their works; see our footnote number 82.
masonic ideals, and doctrines, should by himself, as a man, provide for such conclusions, independently of the Institution, the applications that he freely considers appropriate, with the serenity, the limitations and the human philosophy that characterizes every mason\textsuperscript{100}.

Summarizing, during Cuba’s lengthy road to independence, Masonic lodges fulfilled the three key functions discussed in Section 2.2: connecting, disseminating and incubating ideas.

Thence, (1) through their involvement in Masonic lodges, Cubans interested in autonomy or independence (two roads leading to socioeconomic development) were able to meet, exchange and enrich their ideas, and create parallel organizations to implement them. Spanish authorities (2) recognized and feared such bonding and nurturing catalytic effect. Thence, as independence war started, Spaniards closed autochthonous lodges, in Cuba and in Puerto Rico\textsuperscript{101}.

Similarly, during the 1959 revolution that brought Castro to power, many Cuban masons participated, peacefully\textsuperscript{102} and otherwise\textsuperscript{103}, on both sides. Many revolutionaries were themselves, or had family and friends who were, Masons. Thence, the new government was well aware of the institution’s relevant and long involvement in Cuba’s struggles and civic life.

We propose that Castro’s government recognition of GLC historical role was influential in permitting GLC to continue operating after 1960. Another important reason why the GLC functioned without government interference was advanced by PGM Piñero del Cueto in his 1971 report to the Conference of Grand Masters of North America: “because of the desire of the Cuban government to avoid an adverse reaction from international Masonry”\textsuperscript{104}.

3.2.2 The singular nature of Cuba’s Marxist regime

The second item of Question 2 is answered as follows: as opposed to Russia, Germany, Italy or Spain, where the new government leaders had a well-defined ideology when arriving to

\textsuperscript{100} Miranda, 280 and 281
\textsuperscript{101} Other associations: religious orders, cultural and regional clubs, etc. were NOT closed by Spanish authorities.  
\textsuperscript{102} GM Piñero del Cueto exhorted both sides to stop the armed struggle and solve peacefully their differences.  
\textsuperscript{103} Artemisa Lodge served as meeting and training site for revolutionaries that participated in the Moncada Barracks assault, the first armed conflict against Batista. Torres-Cuevas, 211, and Bro. Fernandez-Callejas’ article ‘Accion de la masoneria en el movimiento de liberacion a Cuba’, Mundo Masonico, La Habana. Jan/Feb. 1959.  
power, the young 1959 Cuban revolutionaries were an heterodox mix of nationalists, liberals and socialists\textsuperscript{105}. In addition, Cubans had not fought an enemy supported by Freemasons\textsuperscript{106}.

Finally, as opposed to Poland, Czechoslovakia or Hungary after WWII, Cuba was not invaded by the Russian army, which then appointed their new government leaders. Cuba’s geographical situation in the Americas, permitted the new Cuban government (1) a larger degree of autonomy vis-a-vis the Soviet Union\textsuperscript{107}, to (2) develop a different type of Marxism. Notice how, in addition to the singularity of allowing Freemasonry to operate, Cuba is the only communist state that never included, as part of its official name, the adjective Socialist, Popular, or Democratic. Cuba’s official name remains simply, \textit{Republic of Cuba}.

\textbf{3.2.3 Unorthodox approaches the Cuban government applied to effectively control the GLC}

To analyze how the Cuban government was able to effectively control the GLC, it is necessary to review the events occurred in it, starting in the 1950s\textsuperscript{108}. During GM Piñeiro del Cueto’s ten year tenure, relevant events such as doubling of GLC membership to over thirty thousand, and the number of lodges to over 300, occurred. Also, several international Masonic events\textsuperscript{109} were held in Cuba. And the GLC built a new high rise.

GLC membership included large merchants and land owners, but mostly middle class professionals, small businessmen, workers, tradesmen, employees, and farmers, of all races\textsuperscript{110}. Such socioeconomic heterogeneity allowed GLC membership to remain above nineteen thousand during the 1960s, in spite of the emigration of 10% of the Cuban population, mostly from its middle and upper classes. But the changes in political system caused shocks that rocked the institution. And, as occurring in the general population, Cuban Freemasons also split into pro and anti-government factions.

Such situation was replicated in the GLC leadership\textsuperscript{111}. In 1960, GM Tarajano emigrated to Miami, leaving DGM Aurelio Alvarez in charge. Shortly after, Alvarez also left the country,

\begin{flushleft}
\textsuperscript{105} Most Cuban revolutionaries became Marxists, and started reading this theory, after seizing power in 1959. \\
\textsuperscript{106} As occurred to Lenin v. Kerenski, in Russia, in 1917, to Franco v. the Republicans, in Spain, in 1936. \\
\textsuperscript{107} Precluding Soviet troops invading Cuba, as occurred in Hungary in 1956 or in Czechoslovakia in 1968. \\
\textsuperscript{108} For details of GLC history under the revolution see Torres-Cuevas, 226-244; or the GLC Web Page: \url{http://www.granlogiacuba.org/masoneria-revolucion} (Accessed IX/28/13). \\

\textsuperscript{111} For more details see Torres-Cuevas, 226 to 238, and the mentioned GLC Web Page
\end{flushleft}
passing the leadership to Grand Senior Warden Cespedes Mora. In Florida, Tarajano formed the
*Grand Lodge of Cuba in Exile*. In Cuba, several GLC officers were arrested for conspiring to
overthrow the regime while others actively supported it. Meanwhile, several GLC meetings
were held and proposals backing or criticizing the new government were heatedly debated.

The years 1960-65 constituted a transition period, where the GLC leadership remained
ill-defined, several Grand Officers resigned, and others were arrested, left the country or changed
functions. In 1965 Dr. Francisco Condom was elected Grand Master, and some stability finally
began to emerge. GLC, however, came out from this difficult period weakened, both politically
and institutionally. In the ensuing years, its membership declined to about 40% of that of 1958.

Torres-Cuevas proposes five causes for GLC decline during 1960-1970: (1) economic
impact of the revolution in the upper and middle classes; (2) massive exodus; (3) diminished
credibility of Freemasonry to provide solutions to the country’s social problems; (4) political and
social marginality, as a result of the new regime, and (5) death of older members.

This author adds a sixth cause: explicit government policies created to disincentivize new
affiliations and promote attrition, especially among the young. During the 1960s and the 1970s,
belonging to a lodge or a church was seen by the regime as an indication of lack of zeal. Thence,
known members of lodges or churches, found large difficulties to study at the university or
other specialized schools, to find or keep a good job, to obtain a promotion, or alternatively to

---

112 Recognized by the Conference of US Grand Masters: [http://www.granlogiacuba.org/masoneria-revolucion](http://www.granlogiacuba.org/masoneria-revolucion). At the time, based on Russian and Eastern Europe experiences, some GLC officers thought it would also be dissolved.  
113 Especially newly elected GM Cuervo Calvo, who was later released, then replaced by DDGM Martinez Gomez and allowed to emigrate. Torres-Cuevas, 236-237.  
114 This author’s father, an 18th Degree Mason, attended several of these meetings, where proposals to dissolve the GLC were defeated. In spite of so many problems, GLC continued operating albeit with a lower profile.  
115 Torres Cuevas, 241-242.  
116 Mandatory government surveys known as *Cuentame-tu-vida* were frequently passed in schools and workplaces, asking about religious beliefs and membership in churches and fraternal organizations.  
117 In 1969, this author, as a college student in his early twenties, had to struggle with such situation and decisions. In 1965 he was expelled from the university and sent to the UMAP labor camps for two years. He wrote a collection of short stories about his UMAP experiences (*Los Unos, Los Otros y El Seibo*, Ediciones Universal, Miami, 1971) published outside Cuba under his father’s Pen Name *Beltran de Quiros*. The book was praised by Prof. Seymour Menton, a UC Irvine specialist on Latin American literature, in his treatise *Prose Fiction of the Cuban Revolution* (U. Texas Press, 1973). In 1979, the Cuban government found out, and he was arrested by the security apparatus, then *Released Guilty* (under parole). Eventually, he graduated with a Maths degree from the University of Havana, but was forbidden to teach in Cuba. During the past 33 years, he has read statistics in American, Spanish and Latin American universities, directly, as Fulbright Scholar, or the Juarez Lincoln Marti Project, that he founded in 1994: [http://web.cortland.edu/matresearch](http://web.cortland.edu/matresearch)
emigrate\textsuperscript{118}. As a result of these government policies, the membership in the GLC not only decreased, but became older, less influential, and less educated, than in the past\textsuperscript{119}.

Bro. Roger Fernandez-Callejas (hereon BFC), a relevant Cuban Freemason and masonic author\textsuperscript{120}, discussed this situation in his mentioned AQC paper. BFC wrote: “Presently the lodges are working under serious difficulties. Initiations are few because few have the courage to join in the face of opposition and harassment. There are resignations of members virtually every day. (…) Lodges cannot meet regularly because of difficulties placed in their paths (…) for example, a government license is necessary for each meeting. (…) Brethren are laboring under the most adverse conditions”\textsuperscript{121.} The conditions reported by BFC from exile were the ones under which this author became a Freemason, in 1969.

This author\textsuperscript{122} developed a formal statistical model to analyze the decline of Freemasons in the GLC during the 1960s\textsuperscript{123}, assessed and published in a peer-reviewed statistical journal.

The model considers and compares actual membership with estimated Masons who left the country, or the institution, as well as those who died. The \textit{significance of the statistical model} lies in identifying and quantifying the different sources of membership attrition during this decade. The largest attrition component consists of those leaving the GLC because: (1) Freemasonry no longer represented their ideology (but the new regime did), plus (2) those who feared the consequences of the government policies to disincentivize membership.

We still need to consider another unquantifiable component: those who never affiliated to GLC because of the two above reasons. Table 6 summarizes the model findings:

<table>
<thead>
<tr>

\textsuperscript{123} \textit{Journal Estadística}, Inter-American Statistical Institute. 63 (181), 57—75. Also see footnote 13.
Prior to 1959, GLC developed several important social and educational programs that BFC discussed in his 1969 AQC paper. Of these programs, only three remain active: Library and Museum\(^{124}\), Academy of Higher Masonic Studies\(^{125}\), and Masonic Home\(^{126}\). GLC social and educational programs: Shoe Fund, Masonic Dress, National Masonic School, and the Masonic\(^{127}\) University ended when the government took over all levels of education and all social agencies.

### 3.3 How, if in any way, has the Castro regime tried to use the GLC?

The *third question posed, whether the Castro regime tried to use the GLC to pursue its policies, as Napoleon Bonaparte tried to use Freemasonry* to consolidate his expanding Empire, requires an answer in two parts: before and after 1990.

Before 1990, Cuba (1) received economic support from the Soviet Union and the Eastern Block, and (2) was interested in spreading revolutionary systems to the Third World, where Freemasons are often members of the upper classes. Hence, using GLC to advance its interests was not efficient, as Masons represented a different cohort than the one targeted by the regime. Furthermore, Soviet and Eastern Block economic support was sufficient.

This situation changed in 1990, when the Soviet Union and Eastern Block disintegrated. Cuba lost their subsidies and underwent times of extreme difficulty\(^{128}\). To survive, internal and external policies radically changed. First, mixed Private-Government corporations were created to build hotels. Expatriate\(^{129}\) and international tourism was fostered as a source of income. Then, in 1991, the Cuban Communist Party (CCP) Congress authorized its members to join the GLC and the Churches, and vice-versa. Table 3 shows GLC membership growth in the 1990s, and uses two growth models to assess the relative impact of the new CCP policy.

\(^{126}\) GLC Web Page: [http://www.granlogiacuba.org/asilo](http://www.granlogiacuba.org/asilo) has capacity for 90 interns but is in poor condition. Recently volunteer Brethren have provided voluntary time to help maintain it.

\(^{127}\) This author’s father read law in the Masonic University until it was closed in 1960.

\(^{128}\) These difficult times are officially known in Cuba as *Período Especial en Tiempos de Paz*.

\(^{129}\) Remittances from Cubans abroad, and expenditures from their visits to relatives, are two important sources of hard currency [http://www.ascecuba.org/publications/proceedings/volume21/pdfs/perezlopezdiazbriquets.pdf](http://www.ascecuba.org/publications/proceedings/volume21/pdfs/perezlopezdiazbriquets.pdf)
Before 1991, the Cuban government closely supervised all Masonic lodges\textsuperscript{130} and it was generally assumed that there were undercover informants and government agents among Cuban Freemasons. This became public knowledge when PGM Collera-Vento (2000-03) appeared in Cuban TV, announcing that he had been, for thirty years, a Secret Police informant\textsuperscript{131}.

After 1991, things changed. Thousands of new Masons, including CCP and government officials and members of political dissident movements\textsuperscript{132}, joined the GLC, and are eligible for election to GLC leadership. Thence, both government and opposition can now, through them, exert a larger influence in the development of the institution.

This new situation, well managed, provides GLC with two singular roles. Raul Castro’s administration has been (1) slowly pursuing economic and political changes inside Cuba, and (2) expanding international contacts to finance them. The almost thirty thousand GLC members can, as discussed in Section 2.3, contribute to develop economic and political change through their participation in CS. And the international relations of Freemasonry can help the Castro administration to expand its contacts abroad, in search of badly needed hard currency.

Such opportunities, addressed sagely as done by the CCH and Caritas\textsuperscript{133}, can significantly help GLC recover its past relevance, inside the island and abroad\textsuperscript{134}.

But in recent years, in spite of new activities, such as regional masonic conferences\textsuperscript{135} that predict a brighter future, the GLC has changed slowly, as attested by its outdated Web Page\textsuperscript{136}. GM Evaristo Gutiérrez Torres has not traveled abroad, and has kept a low profile.

On the other hand, Grand Commander Lazaro Cuesta Valdes\textsuperscript{137} of the Supreme Council of 33\textsuperscript{rd} Degree\textsuperscript{138} (SCG33), elected in 2011, has made large strides. Under Cuesta’s stewardship,

\textsuperscript{133} Section 2.3 of this paper-details how Caritas and Church contributions have persuaded the Cuban government to allow the establishment of Web publications, new educational programs, restoration of churches, etc.
\textsuperscript{134} Such as requesting from the Cuban government to provide inexpensive internet and Web Page access, facilities to acquire computers for every lodge, and facilities and authorization to develop new Internet publications, workshops, training programs, and other courses for GLC members, with the help and support of Freemasons abroad.
\textsuperscript{135} An example of GLC regional conference \url{http://www.granlogiacuba.org/node/791} (Accessed IX/29/13).
\textsuperscript{136} GLC Web Page \url{http://www.granlogiacuba.org/} costs US$600/year to operate, paid with donations from brethren abroad, which provides 60 hrs/month of connection time and a small buffer, evidently insufficient to keep it up-to-date. (Personal Communication from the Chair of GLC Committee for Foreign Relations. Email of X/21/2013)
SCG33 developed an active Web Page and a presence in Facebook. IPH Cuesta has organized an International Conference on *Freemasonry and Integration to Current Society*, a topic that suggests an active interest in developing broader membership participation. A second international conference, on the same topic, is under preparation for 2014.

Grand Commander Cuesta Valdes also has, in the past two years, visited Rome, as well as both USA Supreme Councils (Northern and Southern Masonic Jurisdictions), in Ohio and Washington, DC. During this last trip, IPH Cuesta Valdes visited Cuban Lodges in Miami, and has informally met with other Cuban masons there.

The SCG33 invited Cuban masons abroad to an open meeting, held in Havana on October 2013, to discuss ways for resolving the masonic breach that have separated Cuban masons in the island and abroad, for over fifty years. The GLC has closely followed these events. GM Gutierrez Torres also participated in meetings with Cuban Freemasons in the

144 Hundreds of Cuban Freemasons, former members of GLC, now live abroad. Many have joined lodges in the US, Spain, Puerto Rico, etc. This author belongs to Resp. Lodge Jose Celso Barbosa 106, in San Juan, Puerto Rico.
146 There are three parties (Grand Lodges of Florida and Cuba, and Cuban Freemasons in the USA) whose legitimate interest must be served, while preserving both the Ancient Landmarks and the respective Constitutions. Negotiations must address two important legal issues: the irregularity of some members and lodges, and respecting jurisdictions.
147 Several irregular masonic groups exist in the USA, mostly in Florida, and New Jersey. Among them Gran Logia de Cuba en el Exterior, Grand Logia Unida de las Antillas, Serenisima Gran Logia, and Federacion de Masones Cubanos Cuba Primero. See [http://www.francmasoneria.org/masoneria-en-miami-logijas-que-trabajan-en-espanol/](http://www.francmasoneria.org/masoneria-en-miami-logijas-que-trabajan-en-espanol/) Many Cuban masons who, until recently, were required by the Cuban government to demit from their lodges at the time of leaving the country, found problems to rejoin the Craft in the USA. Such problems, which are not faced by masons in Spain and Puerto Rico include: language barrier, high cost of affiliation, different protocols (American lodges work in York Rite, while Cuban lodges use Scottish Rite) and race (many US lodges had, especially in the past, restrictions regarding non-white masons wanting to join. Some Cuban Masons are of mix-race or black).
Diaspora and drafted Official Message No. 6. Some of its content addresses GLC events occurring half a century ago, difficult to ascertain, as their main actors have long disappeared, and there is little documentation remaining, especially to support interpretations of intentions. The cost in dollars to travel to Cuba, especially for Cubans abroad, is not small, and provides another stream of badly needed hard currency for the Cuban Government.

Summarizing, GLC is much larger, in membership and lodges, than SCG33. However, it has been unable to maintain an updated Web Page, or to organize international conferences, like the SCG33 has. The GM of GLC has not traveled abroad, while the Grand Commander of SCG3 has. It is yet too early to assess whether this is due to leadership styles and abilities, or to other factors, such as Cuban government interest in using Freemasonry, in the manner indicated above.

4.0 Conclusions

We have presented (1) a summary of statistical, demographical and historical analysis of the development of the GLC during the second half of the XX Century, and (2) a discussion of the reasons for its singular existence and continuous operation inside a Marxist regime. In our opinion, such singular existence is due to (1) the singular characteristics of the GLC, (2) its connection to international Freemasonry, (3) the singular characteristics of the Cuban regime, and (4) the singular way in that, the Cuban government, has been able to harness the Masonic institution, as well as its members.

Comparing the GLC situation to say, that of Freemasonry in Nazi Germany, excellently described by Bro. Howe, we distinguish five specific differences: (1) a stronger presence of GLC: Effective Masons in 1958 Cuba, were 20.5; in 1925 Germany, and considering all its Grand Lodges and a population of sixty million, Effective Masons were only 5.37. Then, (2) GLC did not have a Jewish membership issue, anathema under Nazi Germany. Cuba had a race issue. But GLC was one of the most widely racially integrated institutions in the country, an

151 Ellie Howe’s aforementioned AQC paper Collapse of Freemasonry in Nazi Germany.
152 German Effective Masons = TotMasons/(TotPop/4) *1000 = 80559/(60M/4)*1000 = 5.37
objective strongly pursued by the 1959 revolution. In addition, (3) government efforts to dissolve the several Grand Lodges were fruitful in Germany, in 1934, but unsuccessful in one, united GLC, in 1960. Finally, (4) GLC had a long tradition of civic involvement in Cuban struggles. Civic participation was weaker in Germany, especially after WWI. On the other hand, an analysis of Bro. Howe’s paper will also establish significant similarities in both circumstances, especially government harassment and subjection of Grand Lodge members to similar discrimination in employment, and other advancement opportunities.

At the time of writing this paper very interesting events are occurring in the GLC. There are important meetings taking place between Cuban Freemasons in the island and abroad, as well as between the Grand Lodges of Cuba, and Florida. Such meetings seek a solution for the situation of the several hundred Cuban Freemasons, currently in the USA and especially in Florida and New Jersey, affiliated to *irregular* masonic organizations, or remaining unaffiliated for the reasons expressed in footnote 147.

The second half of the XX Century also coincides with one of the most interesting and challenging periods of the history of the Cuban nation.

**Acknowledgements**

We appreciate the assistance of Bros. Thomas Savini, William Krueger, Luis Otero, and Larissa Watkins, of the Libraries of the Grand Lodges of New York, Iowa and Puerto Rico, and of the Scottish Rite (SMJ), respectively, for facilitating our searches, as well as for lending us many useful books and documents, throughout the years. We especially acknowledge the contributions of Bro. John Acaster, motivating our writing of this second part of our paper.

**Appendix 1: Key Points in Message No. 6 of GM Evaristo Gutierrez Torres**

See document url in footnote 149:

1) In the decades of 1960 and 1970 a group of GM and PGM of the GLC, formulated a strategy to save the Cuban Craft of an eventual intervention by the Cuban Government.

2) In those years, this was a real possibility, mainly supported by the precedents of what had happened to the Craft under totalitarian systems.
3) Such strategy consisted in the creation of a Delegation of Cuban Masons Abroad, stationed in the State of Florida, with the agreement of the GM of Said Grand Lodge
4) Said Delegation would be charged of organizing exiled Cuban Masons into Lodges that, given the event that the Craft inside Cuba were intervened (by the government), they would be ready to guarantee the survival of the GLC outside of its jurisdictional.
5) The evolution of historical events allowed such unforeseen possibility to never materialize, reason for which the GLC, in the years of 1980, became aloof of such organizations.
