

Current Topic 6 – Due 4 May
Dr. Anderson – PSY 501

Your school has just been awarded a \$20,000 grant designed to make improvements to the school in a way that would benefit **all** students who attend the school. There are no other restrictions – you may apply it to any viable area as long as all students at the school benefit from it (those with special needs, gifted, athletes, artists etc.). You may apply it to one overall project or divide it between several. Depending on the proposed uses the granter has indicated that they may be willing to increase the amount of the grant if the justification is convincing.

You are on a task force that is to propose the use(s) of the money. This must be **solidly based in the research** that demonstrates the value of the use you are proposing.
