

Reflections#5

1. Please reflect on your learning experience in this course. Please write down the things you would recommend the instructor to KEEP if she gets a chance to teach the same course again.

- The small group analysis was a great assignment.
- Class discussions are good + student presentations kept us involved in the class.
- Readings were useful + relevant - especially The First Days of School + Teaching Children to Care. Definitely use those again.
- Lots of useful resources.

2. Please write down the things you would suggest the instructor IMPROVE.

- When you have students present, stick to the time limit you set because many of us, went way over.
- The assignments need to be written more clearly + ~~more~~ specifically state what you are looking for.

3. Any other comments and thoughts to share with the instructor?

~~Thank you~~
 You have shown a high level of professionalism + ~~thought~~
 throughout the semester. The trip to the Historical Society
 was very helpful. Your students felt free to ask you
 any question

Please feel free to use the reverse side. Thank you very much for your time. I am grateful that I have you all in this class this semester. Your participation is highly appreciated. - Lin Lin
