

Reflections#5

1. Please reflect on your learning experience in this course. Please write down the things you would recommend the instructor to KEEP if she gets a chance to teach the same course again.

I have learned so much in this class!
 Out of my 3 classes I am taking this semester I would have to say that this one is the most interesting. I like all the group work, fun activities, fun ~~fun~~ videos; and educational assignments. The trip to the historical society was awesome to. Everything has caused me to reflect on my teaching and given me great ideas

2. Please write down the things you would suggest the instructor IMPROVE.

Everything is awesome! The only thing I would change would be a little more clarity in the standards assignment. I liked it but my group was somewhat confused on how to answer the questions. Everything else is great! Please continue to do that.

I like the individual presentation too and you have a great selection of books and materials. And yay for not having to spend money on books!!

3. Any other comments and thoughts to share with the instructor?

You are a wonderful professor and your enthusiasm and exuberance makes the class fun. Even though we are grad students, we still like to have fun and you have done this for us. You also teach in a way that each person can understand and relate regardless of their level of experience. I am looking forward to taking you

Please feel free to use the reverse side. Thank you very much for your time. I am grateful that I have you all in this class this semester. Your participation is highly appreciated. - Lin Lin

again next semester!!
