RE: Application to the Graduate Faculty

The Graduate Faculty Executive Committee has reviewed your application for Graduate Faculty membership. There are five criteria for membership and one of these is faculty rank. Membership requires that a faculty member "*holds the rank of professor, or associate professor, or librarian, or associate librarian, or administrative position of school dean or above.*" Our review of your application indicates that although you meet all of the other requirements for membership, you do not meet the requirement of holding the rank "professor, or associate professor." Therefore, we cannot grant graduate faculty status at this time.

We look forward to reviewing your application in the future, as you certainly appear to be very well qualified in all other areas required for Graduate Faculty membership.
