

# Two Scientists **DEBATE** The Pros & Cons of **GAS DRILLING**

**Professor Anthony R. Ingraffea** (Engineer, Fracture Expert, Cornell University)

*Dr. Ingraffea opposes the large scale industrialization of the countryside required for shale gas extraction. He has given many presentations around the Northeast explaining the harmful impacts the proposed hydraulic fracturing technology will have.*

**Professor Donald Siegel** (Hydrogeologist, Syracuse University)

*Dr. Siegel is a proponent of shale gas extraction and has appeared in many industry television ads stating his support of this technology. He categorizes the views of gas drilling opponents as "irrational fears."*

Sunday  
February 20, 2011  
2 - 4pm  
Brown Auditorium  
Old Main, SUNY Cortland  
Cortland, NY

Don't miss this chance  
to hear a balanced  
presentation on a topic  
that will affect us all!

Organized by GDACC (Gas Drilling Awareness for Cortland County) and sponsored by SUNY Cortland: Office of the President, NYPIRG, Philosophy Department, and Center for Gender and Intercultural Studies and co-sponsored by many area organizations.
