RE: 2007-2008 SCAP Request

Thank you for submitting a 2007-2008 SCAP request. I am pleased to inform you that the SCAP Committee has approved your request for the following:

- Software and teacher's guide providing software is compatible with lab computers and operating system

However, we have determined that the windows version of this software is not quality assured and the owner of the company indicated there will be problems installing on Windows computers. Therefore, Beth Klein has agreed to let the software be installed on a few of the mobile lab laptops that still have OS 9. Steve Marstall and Lisa Kahle will work with you to determine next steps.

As indicated in the SCAP announcement, Academic Computing Services will procure, test, and install the software during the spring semester and summer so the software is available for use in Fall 2008. Lisa Kahle, Director of Academic Computing Services, will coordinate the procurement and installation of the approved items.

Congratulations on having your request approved.
