

**Howard Zinn****Chapter 17 "Or Does It Explode?"****TASK:**

- 1) Please create a quiz with at least 6 questions using Bloom's Taxonomy. According to Bloom's taxonomy, the cognitive domain of thinking is described to have six levels – knowledge, comprehension, application, analysis, synthesis, and evaluation. So please come up with at least six questions, each of which must address each of these thinking skills at all six levels.
- 2) For each question, please provide a sample answer that could serve as a rubric for evaluation. You could use this table to list all the questions to match the six levels of questions. Please feel free to be creative with your own way of completing this task.

| <b>Thinking Levels</b> | <b>Question and Answer from Chapter 17</b> |
|------------------------|--|
| Knowledge              |  |
| Comprehension          |  |
| Application            |  |
| Analysis               |  |
| Synthesis              |  |
| Evaluation             |  |
