Dear Lin,

Thank you for responding to my call of mentors for my EDU 651 Understanding and conducting Educational Research fall 2009 class. Students you volunteered to mentor said they benefited tremendously from your responses to their inquiries on the content area of your expertise. They said the the references you provided for their action research were very helpful.

The EDU651Fall 09 class and I are especially grateful to you for attending our final presentation and providing comments and suggestions to students presentations.

Your willingness and spirit in collaborative teaching is encouraging to me and I will do the same in return in the future to your call of collaboration and sharing of my expertise to enrich the learning experiences for our graduate level students.

Shufang
