

EDU 375 – FALL 2006  
KIMBERLY ROMBACH

COMMENTS:

- I think a lot of assignments in this course were very useful. I think the unit plan should have been worth more because it took so much time.
- My favorite and most structured class. Thank you.
- Kim is by far the best block teacher ever. I actually learned something!
- Professor Rombach was by far one of my favorite professors. She had a very effective teaching style and taught extremely relevant information for my future. Given the opportunity, I would definitely take a course from her again.
- Kim is a phenomenal professor. She makes it known that she is available to help in any way possible. All assignments are relevant, and I feel I have gotten a lot out of them. I wish she was able to teach every education class at Cortland!
- I learned a lot in this class. The material we covered was extremely useful. I am glad we were taught about the multiple perspectives. Thanks for an educational semester!
- I just want to say thank you for really being such a good professor. You clearly know how to address your topics as well as present in a very effective way. I hope I can be just as effective and have an impact on my students as well as you (Maybe our daughters will be future teachers together)!
- Although some assignments were difficult to complete, they were worth the effort because I feel well prepared to teach Social Studies in the future. Kim is well organized and provides many examples of what she expects of us. Her website was invaluable when I needed details about an assignment or notes from class. Kim is an all-around excellent teacher.
- I absolutely loved this class and enjoyed doing the assignments even though they took a lot of time. I feel that all the projects were important and helped enhance my learning. The only thing I would suggest is that on the Unit Plan, have the lessons due on different days throughout the semester and then a final complete unit at the end. I think it would also be beneficial to correct the unit after you make comments so that our units are in very good shape at the end with all corrections fixed.
- This course was by far my favorite class. I have learned a lot and the assignments were very useful. I enjoyed creating my virtual field trip. I enjoyed the

community builders and the learning center I created. Professor was well organized and assignments were given back on time. She gave good feedback on assignments. IT was a pleasure coming to this class. There was a lot of work to do but it was worth it.

- Kim is very approachable and sincere. I always felt comfortable going to her for help. The assignments were difficult to complete but they were very useful, especially the virtual field trip. I really enjoyed the class and I learned a lot. She was always there to help.
- Kim works great with her students. She strives to create a community in her class which I will strive to do someday as well. She is by far the most pleasant instructor I have ever had. The unit plan was the most difficult for me. The rubric was difficult to understand so maybe it could be more clear and concise. I would suggest a step-by-step outline of how to organize and what to include in one rubric instead of two separate ones.
