

EDU 510 – SPRING 2005
KIMBERLY ROMBACH

COMMENTS:

- It was a pleasurable experience. Next time I would space out larger assignments.
- I appreciate how you took time to help me throughout this course. When I first read about our website, I was very nervous. Now I actually enjoy working on it and hope to get it better. Thank you so much for everything.
- I loved this course! I can't wait to create a website for my class!
- I appreciate your enthusiasm.
- I have learned so much in this class! Above all, I have learned from examples as I watch your word choices, etc.
- More class time to work on technology assignments would have been beneficial for learning.
- A truly refreshing and positive classroom experience. Much of the work was difficult and time consuming, but the positive and supportive environment and the instructor made a huge difference in making it through in one piece.
- Dr. Rombach did a great job teaching me about the many broad issues of teaching. Also, she is knowledgeable and skilled in web design and obviously loves doing it. I appreciated all the extra time and encouragement offered throughout the semester.
- This course has required I grow in the technological area and I'm grateful for that. I feel better equipped to teach and to address issues in education.
- Dr. Rombach is always very upbeat and it is contagious. I enjoyed her class each and every week.
- This class was extremely helpful with teaching about technology. I enjoyed it thoroughly. The instructor was wonderful as well as helpful!
- I really enjoyed all aspects of this course. I found the content to be very interesting. I really like how each home group did a PowerPoint presentation from the diversity book. However, it might be a little easier to do this earlier in the course so that some groups don't have to reread.
- Dr. Rombach is the best professor I've had at Cortland, be it undergraduate or graduate. While the literature review was a challenge, the course was not

unreasonably easy or hard. Kim is a fantastic teacher with a passion that rubs off on the class. I am sincerely happy to have had her for a professor and I hope to work with her again in the future. Thank you Dr. Rombach.

- You are an outstanding professor! I looked forward to each class. The assignments we completed were very challenging but they taught me to use and implement higher-order thinking. Thanks for your enthusiasm, effective presentation style and teaching me a lot.
- The course was definitely comprehensive and well executed.
- Kim has been a phenomenal teacher. She has been a positive and enthusiastic role model and taught us volumes simply by example. Every assignment was meaningful. One thing I would change is the technology section. I wish there had been more written information/instructions for creating the website.
- Professor Rombach is an excellent instructor! Each time we would come to class she always had a smile on her face and you could tell she truly cared about us and wanted us to learn and succeed. She always welcomed our questions and never hesitated to help us when we needed it. She was one of the best professors I have ever had.
- Span out the assignments a little more throughout the semester so that the majority of the coursework is not due the last month of class.
- This class has been helpful in learning many new things, especially in the technology area. I didn't know much about it and have pushed myself to learn. Thank you for a great class and all of your enthusiasm. I have learned a lot.
