

EDU 514.601  
KIMBERLY ROMBACH – FALL 2004

COMMENTS:

- Kim builds student confidence. There was excellent reading material. You can tell she really loves her job.
- Timely feedback is great; you were always positive.
- I wish more professors were like you – open, understanding, and here for the students.
- I only felt I had a lack of information in one area – the large social studies unit plan. I didn't feel like I had enough feedback from the 15 minute unit plan I taught my group. With more feedback, I feel I could have covered my large unit plan more completely and received a better grade.
- I had unusual circumstances throughout the semester. My instructor was more than patient, understanding and enabled me to complete this and another course.
- It would have been helpful to have more examples of assignments. Sample lesson plans and sample unit plans would help many of us feel more confident about doing these assignments. We did have access to many lesson plans but it would be great to be given ones that are good to model. Great class! Thank you.
- It was such a positive aspect of this class to have a teacher who was so readily available for help after class and at home. I knew if I had a question I could always call or e-mail I have developed a new outlook on teaching because of this class!
- Kim was one of the best teachers I've ever had. Not only did she help me with questions I had in this class, she also helped me with my other class. She was always available for help.
- Kim was extremely helpful in and outside of the classroom. She was very effective and I feel that I really learned a lot. She has also helped establish our class as a close-knit group. I would love to have her as an instructor again!
- Excellent instructor and role model. I appreciated having projects vs. tests.
- I really feel that Kim is great at what she does and shows so much enthusiasm and creativity. It makes being in class fun and worthwhile.
- Kim rocks! She is a great teacher who has inspired me to become an activist for multicultural education.
- I am so glad that Dr. Rombach was my first instructor for a graduate-level teaching class. This institution is extremely fortunate to have her as a member of the faculty. I can't imagine anyone being a better teacher. I have no constructive criticism or any criticism.
- The only thing I would have like to spend more time on is the unit plan.
