

EDU 647 – SPRING 2005
KIMBERLY ROMBACH

COMMENTS:

- All of the required assignments in this course were interesting and relevant. However, I think if there were less required assignments I would have really been able to get more out of them.
- I appreciated the instructor's respectful and patient teaching style. She was available for helping me outside of class time.
- I would like to learn more about website building.
- I really enjoyed the web reviews. I feel better about allowing my students on the Internet because I can select the ones I feel are safe for them to view.
- Kim was very helpful to me in this course and in my job search. She is an awesome, caring teacher, and I always enjoyed our class and discussions. I hope to use assignments from this course in my future career.
- I was pleased with the method of instruction and liked how well Dr. Rombach was organized. The reflections on the Berson text were not useful.
- Dr. Rombach does a great job explaining the requirements and is always available for help. She is one of Cortland's best!
